

# Regional Outcomes On Farm for Sustainability

## Invitation to landholders to participate in developing the ROOFS concept

The ROOFS project seeks to incorporate Australia's best methods and tools for addressing natural resource management issues into a system that is useful for landholders. The first step of the project is the stakeholder analysis, which involves asking stakeholders at local, regional, state and national level what they want in such a system.

One Tamar farmer has said:

*'I want a system that incorporates water, soil, vegetation and game management plans, that is linked to a property management plan and helps me deal with the documentation for development and other approvals.'*

Help develop the ROOFS system by having your say at one of the following landholder meetings:

**Tuesday 26 July, 9am – 11am : Tresca Community Centre, Exeter**

**Tuesday 26 July, 1pm – 3pm : Pipers River Fire Station**

**Wednesday 27 July, 6.30pm – 8.30pm : West Tamar Council  
Meeting Room, Riverside**

**Please RSVP to Amanda Bruce, at Tamar NRM**
